COMPANY PROFILE

About the company:

"Admit it or not, we all love seeing landscapes especially during our stressful days. Who wouldn't want see beautifully designed plants and flowers around a building, house or establishment? This is very essential to establishment and building owners to make their place attractive and pleasant. It's where we come in therefore, to make it happen".

Eco Landscapes & Gardening Ltd is a professional landscaping company offering clients with soft landscaping and gardening services in Rwanda. It was founded and officially registered as a private company on 15th March 2021 by Theophile KARASIRA as the Managing Director, with Head Office in Kagugu Cell of Kinyinya Sector in Gasabo District.

Being a passion and prior to official registration, the founder had operated on an informal setting for over five years, by offering soft landscaping services and supplying ornamental & indigenous tree seedlings, flowers, turf grass and shrubs to micro – institutions and individual residences.

It is a first growing company that specializes in providing affordable but high quality services to customers that value natural surroundings, and want to embellish their Houses, Hospitals, Real Estates, High Learning Institutions, Secondary & Primary Schools, Recreation Centers, ECD's etc with well- designed gardens that create attractive green spaces.

The fact that the company owns a nursery bed of a variety of flowers, ornamental & indigenous tree seedlings and shrubs of various types – in addition to fragmented plots of turf grass (paspalum) in the outskirts of Kigali, we are at a comparative advantage of offering a full package of supplying plants materials, installation, and maintenance. All this enables the company to execute landscaping projects of any magnitude, thus, meeting tight deadlines.
